Lock Your Husband in the Kitchen—For One Day

Make him cook the meals, wash the dishes, polish up the stove, take out the ashes, if coal; clean out the refrigerator, empty the drip pan, scour kettles and pans, shine up the tinware and silver, put out the garbage can, clean the gas range, scrub the floor, wash the windows—but what's the use? He would break out somehow and rush to Parsons-Souders and get all the labor saving help he could, not for himself, but for his wife, because he could see kitchen work is drudgery with poor equipment and a pleasure where all the latest devices are at hand.

OF INTEREST TO WOMEN

Needle and Pin Pricks.

When you have pricked yourself, your finger, or no matter what part of your hand or body with a needle, pin or any sharp fine instrument, and you have not hurt any vein or muscle seriously, the first thing to do is to make it bleed sufficiently so that the blood cannot coagulate beneath the skin.

If the wounded part does not bleed, immerse it in as hot water as

But in no case must you ever rub the pricked spot with a hard object, as for instance the seamstress does with a thimble. It is as silly a custom as putting dirty spider webs on a wound in order to heal it.
